Subject: Canadian Zinc Corp. Draft ToR and Work Plan - Decline and Pilot Plant EA

Hi Louie/Joe

I have reviewed the draft ToR and Work Plan for the decline and pilot plant EA and have only a couple of comments on the ToR. Spill contingency planning is not specified (although it is implied under Accidents and Malfunctions), and should be explicitly mentioned (would that better fit under environmental management planning?). Section 7.9 on water quality should include volumes for predictions on discharges. The workplan timelines are fairly tight, but I think that is appropriate given the scale of the project.
