**RE: Canadian Zinc Corporation**

The Liidlíí Kue First Nation would like to express concerns regarding any permit applications from the above company. This letter is to address any proposed activity the company has planned.

As down river users, we are very concerned about the quality of water. Therefore, the Denendeh Resources Committee members want water samples collected before any possible development is established. These samples are to be collected from downstream of the South Nahanni River, Sundog Creek, Ram River and Prairie Creek. This will be done in order to establish a baseline to compare with future samples. If and when development begins, water samples are to be taken on a daily basis, at the same locations, to monitor any fluctuations with the status quo. If there is fluctuations detected, these problems and/or discrepancies can and will be addressed. These tests are warranted because of the consideration of the harvesters and traditional land users that can and will be affected should an unknown variable be introduced to a delicate ecosystem.

We would like consideration for the water and the samples for each and every permit application submitted by the Canadian Zinc Corporation.

Mahsi,

  
for Chief Rita Cli
