Subject: RE: Information on Diffusion for NRCan

Please note that in discussion with the Chair on the De Beers file, the MVEIRB will not file this document to the public registry at this late date, two working days prior to the public hearing. It is suggested that if you wish the information from the report to be filed to the public registry, and therefore considered by the Board, that the information from the report be brought forward in presentations at the hearing.

Feel free to contact me.

Subject: Information on Diffusion for NRCan
Importance: High

Hello John,

My apologies for the mistake. I have attached the e-file of the document. The desired data from the EA is re-presented in the form needed. I hope that this information is useful in preparation for the Hearing.

Thanks,
Robin

Subject: De Beers' 14 Page document on upward diffusion issue

Hi Robin,

With reference to your April 17th e-mail to Glenda (and Glenda's response, April 18), would it be possible to obtain an electronic copy of that 14 page document on the upward diffusion issue?

Thank you.

Subject: RE: NSMA submission on preliminary and jurisdictional issues

Robin:

As per my voice-mail message yesterday, it is reasonable to submit the
information (as per your email below) to NRCan and file to the public
registry.

Glenda

Subject: RE: NSMA submission on preliminary and jurisdictional

issues

Good afternoon Glenda,

I seek clarification with regard to the Boards intent to resolve
technical
issues before the Public Hearing. At the pre-hearing conference,
John

Donihee noted that it was not the Boards intent to prevent the
resolution of
technical issues between parties prior to the Public Hearing;
instead it was
hoped that parties would continue to work to resolve issues.

NRCan presented an issue around upward diffusion that De Beers would
like to
resolve. De Beers had a conference call with NRCan (as previously
submitted
to the Board) to clarify the issue and try to resolve it. NRCan
stated that
further information was required to resolve their issue. De Beers
has
collected the requested information and would like to submit it to
NRCan.

De Beers seeks clarification from the MVEIRB on whether it is
reasonable to

submit this information to NRCan and copy the Public Record at this time.

The requested information constitutes about 14 pages. Most of the information is simply data that is already in the EA but has been re-tabulated or graphically represented to more clearly communicate the information. It is our understanding that NRCan would like to raise and discuss the issue at the hearing anyway.

It is my understanding that submission of this material would meet the intent of the Board to continue to resolve issues as communicated by John Donihee but request confirmation.

Thanks,
Robin
