Subject: RE: De Beers EA - Government Reviewers - EA Coordinators

Louie,

My coordinates, as indicated in the signature file, should be used for Fisheries and Oceans' point of contact. DFO will provide specialist advice in the following areas:

- * fish biology/habitat/management
- * aquatic ecology
- * impact assessment design
- * effects of contaminants on aquatic systems

Though DFO could provide CV's of our experts should a request be made, may I propose that advice/opinions be evaluated based on weight-of-evidence rather than the experts current or past jobs. An EA is not a court room, it is a slow, inclusive, open, and iterative process where weight of evidence can afford to be used, regardless of whether the advice/opinion arises from Mrs. X or Dr. X.

Marc

P.S. I find email discussions disruptive in that it clogs my inbox and doesn't offer an open venue for discussion. As such, I have only emailed you. I'm sure we will all have time to discuss these matters at the meeting you've so graciously organized.
