SUBJECT:

Dear Bob,

Re: Organization of Elders workshop for Snap Lake Diamond Project Environmental Assessment (EA)

At the Technical Sessions held in Nov/Dec for the Snap Lake EA, the idea of an Elder's Workshop to discuss potential impacts to caribou and mitigation measures was raised. At that time you stated that you would be willing to organize such a workshop that would bring together representatives of the aboriginal organizations represented at the Technical Session.

De Beers would like to enquire as to whether it is still your intention to organize the Workshop and when it would likely be held.

Regards,

for Robin Johnstone
Senior Environmental Manager
