Subject: Re: Paramount Conformity

Thanks for the info Alan. However, that is not much notice for the site visit given that others might have wanted to also attend. I am already booked for next week or I would have gone. My clients are also not available at such short notice.

We will also want a list of those individuals who participated in the site visit for the Review Board, Paramount and any consultants and a description of the Review Board's activities during the site visit. We may choose to follow-up on this issue later.

Joe

Dear Joe, Maria, Gavin, Wade and Jen,

The Review Board has determined that the Developer's Assessment Report for this Environmental Assessment is in conformity with the final Terms of Reference. The Review Board will now begin to prepare Information Requests to clarify the developer's impact predictions or to provide additional information as needed.

Parties are encourage to start considering their own information needs for evaluating the technical quality of the Developer's Assessment Report. More information will soon be forthcoming on how to propose Information Requests for the Review Board to issue.

Note that the Review Board will be conducting a site visit to the area of the proposed development on Tuesday, October 7th, 2003.

Alan Ehrlich
Senior Environmental Assessment Officer
Mackenzie Valley Environmental Impact Review Board
