Subject: Snowfield Draft ToR and Work Plan

Hi Sherry,

Please keep Environment Canada on the distribution list for this EA, and any faxes should be marked attention Mike Fournier. The preferred method for receiving materials from the Board is by email, rather than fax, and the above email addresses (sent to both Mike and I please) can be used.

I have reviewed the draft ToR and Work Plan and have only a couple of minor notes to add for the project description/DAR.

- On page 5, Section 4, first bullet of the third paragraph, it is suggested that the term "Nature" be clarified as referring to the nature of the impact (as opposed to "Mother Nature").

- On page 6, under section C-2, it would be helpful for the development description to indicate proximity to water, or at a minimum, the proportion of on-ice holes to land-based drill holes.

With respect to the timetable, at this time it appears feasible for EC staff to meet the schedule as outlined, unless something arises unexpectedly. There is not much leeway in the proposed schedule, and it will need to be recognised that there may be some flexibility required.

Anne
