RE: EA03-008 Deh Cho Bridge Corporation Meeting on Cumulative Effects

DATE: September 3, 2004 at 9:00 a.m.

Andrew Gamble from the DCBC arranged a meeting with the EAO and SEAO to discuss the overdue response for IR 2.1.21, which is supposed to address the Cumulative Effects Assessment (CEA) portion of the DAR.

Andrew was provided with the Appendix H guidance material from the March 2004 EIA Guidelines, as well as other relevant documents to CEA.

We discussed the approaches commonly used in CEA, and answered some general questions on spatial and temporal boundaries, Valued Ecosystem Components and adverse versus beneficial impacts.

Andrew has indicated that the final IR response will be submitted on Tuesday, September 7, 2004.
