**Subject:** Re: re: City Permits for the Demolition of the Giant Mine Conveyor (Addition)

Sorry, I meant to say that securing minicipal approvals and permits is very important for this project. The City should make sure that its jurisdiction is protected and exercised, and that revenues from the project are obtained. The proponents (Canada and GNWT) should also live up to their commitment to comply with municipal legislation. All of this is even more important during the early phases of the project so that good precedents are set, not bad ones. Thanks.

Kevin

Clearly taking the conveyor down would be a change in the intensity of the use of the mine site and of a building.
