Subject: RE: Request to Amend December 23, 2010 Work Plan

Hello all

We just want to put in a note of support in regards to this letter here:

http://www.reviewboard.ca/upload/project_document/1295048436_INAC_request_re_postponing_IRs.PDF

As the participant funding is still not yet announced the original deadline severely limits our ability to set the foundation for future involvement in the process. After all, if we can have expert outside review on a project that will require perpetual care, why not wait a few days so that they can be meaningfully involved?

Cheers

t
