Alistair MacDonald,
Mackenzie Valley Environmental Impact Review Board

Dear Mr. MacDonald,,

Even though the Nahanni National Park Reserve expansion is not complete, Canadian Zinc Corporation has applied for operating permits for the proposed Prairie Creek mine within the Nahanni watershed.

I believe that the proposed Prairie Creek Mine could have significant environmental impacts on Nahanni National Park Reserve and World Heritage Site downstream.

I am writing to ask you to ensure that the environmental assessment you will be initiating will include the entire mine operation, all its components, and the access road, and that it is the most rigorous environmental assessment possible.

Mining companies come and go, but Canada will never have another Nahanni Park.

Thank you for your careful consideration.

Alistair MacDonald,
Mackenzie Valley Environmental Impact Review Board

Dear Mr. MacDonald,,

I am concerned that the proposed Prairie Creek Mine could have significant environmental impacts on Nahanni National Park Reserve and World Heritage Site downstream.

As Canadians, we have a responsibility to protect our national parks and world heritage sites for future generations;

A proper environmental assessment should be at the most rigorous possible level, and review the whole mine operation, all its components and the access road.

Thank you for your consideration,

Murray Stevenson
