Chief Eddie Sangris  
Yellowknives Dene First Nation (Dettah)

Oct 12, 2010

Dear Chief Sangris,

During the information session held in N'dilo on September 30<sup>th</sup>, 2010, TNR Gold Corp had the opportunity to present its proposed work plan for the Moose property to community representatives. At that meeting the representatives were able to ask questions and present their views on potential issues with the program. It was evident from the meeting that there is significant concern over the location and potential disturbance of archaeological sites within the Moose Property.

In its permit application to commence work on the Moose property, TNR Gold Corp committed to assessing and protecting archaeological sites. We would like to initiate this commitment and hope that representatives from your community will assist an archaeologist so that any historic sites can be identified and preserved. The opportunity to apply traditional knowledge directly on the ground to ensure that important sites are protected will be invaluable in planning the first phase of this exploration program.

Ideally we would like to arrange a day when representatives from several different communities can visit site at the same time this fall. If there is an interest from your community to visit the site, please respond to this letter and indicate who will be attending. At this time we must limit the number of people to three per community, but as arrangements move forward there may be opportunity for more. TNR Gold Corp will endeavour to arrange a visit that will accommodate all people involved this fall, in the event that a suitable date can not be agreed upon before the snow falls, a trip can be arranged in the spring once the ground clears.

We look forward to working with the Yellowknives Dene First Nation on this project and future exploration activities.

Respectfully submitted,

Corey Segboer  
Operations Manager  
Aurora Geosciences Ltd.  
On behalf of TNR Gold Corp.
