Jay Project – Developer's Assessment Report

Table of Contents for DAR and Appendices

1	<u>INTRO</u>	DUCTION		
	1.1	Purpose	1-1	
	1.2	Developer	1-1	
	1.3	Project Overview	1-26	
	1.4	Regulatory Process	1-38	
	1.5	Report Development and Organization	1-46	
	1.6	References	1-52	
	1.7	Glossary	1-54	
	Append	lix 1A <u>Terms of Reference</u>		
	Append	lix 1B Code of Ethics and Business Conduct		
	Append	lix 1C Sustainable Development Policy		
	Append	lix 1D Concordance Table		
	Append	lix 1E Commitments Table		
2	PROJE	ECT ALTERNATIVES	2-1	
	2.1	Introduction	2-1	
	2.2	Project Description	2-2	
	2.3	Analysis of Alternative Means Methodology	2-10	
	2.4	Level 1 – Project Mining Method Alternatives Analysis	2-11	
	2.5	Level 2 Assessments	2-40	
	2.6	Minewater Discharge Alternatives for Future Consideration	2-57	
	2.7	References	2-58	
	2.8	Glossary	2-60	
3	PROJE	ECT DESCRIPTION	3-1	

	3.1	Introduction	3-1
	3.2	Project Overview	3-5
	3.3	Geological, Geochemical, and Geotechnical Setting	3-16
	3.4	Existing Infrastructure, Facilities, and Operational Management Plans	3-25
	3.5	Jay Project Components	3-39
	3.6	Accidents and Malfunctions	3-71
	3.7	References	3-72
	3.8	Glossary	3-74
	Append	ix 3A Mine Water Management Plan	
	Append	ix 3B Conceptual Closure and Reclamation Plan	
	Append	ix 3C Risk Assessment for Accidents and Malfunctions of the Jay Project	
4	COMMUNITY, REGULATORY, AND PUBLIC ENGAGEMENT		4-1
	4.1	Introduction	4-1
	4.2	Engagement Policy and Approach	4-3
	4.3	Ongoing Ekati Mine Engagement Activities	4-5
	4.4	Jay Project Engagement Activities	4-5
	4.5	Addressing Concerns	4-30
	4.6	Planned Future Engagement Activities	4-31
	4.7	References	4-32
	4.8	Glossary	4-33
	Append	ix 4A <u>Ekati Mine Engagement Plan</u>	
	Append	ix 4B <u>Dominion Diamond Engagement Registry</u>	
5	TRADI	TIONAL KNOWLEDGE	5-1
	5.1	Introduction	5-1
	5.2	Purpose and Scope	5-3
	5.3	Integration of Local and Traditional Knowledge	5-3
	5.4	Summary	5-12

	5.5	References	5-12	
	5.6	Glossary	5-13	
6	ENVIR	ENVIRONMENTAL ASSESSMENT APPROACH		
	6.1	Introduction	6-1	
	6.2	Selection of Valued Components, Assessment Endpoints, and Measurement Indicators	6-4	
	6.3	Environmental Assessment Boundaries	6-10	
	6.4	Pathways Analysis	6-12	
	6.5	Residual Effects Analysis	6-17	
	6.6	Prediction Confidence and Uncertainty	6-28	
	6.7	Residual Impact Classification and Determination of Significance	6-29	
	6.8	Follow-Up and Monitoring	6-35	
	6.9	References	6-36	
7	AIR QUALITY		7-1	
	7.1	Introduction	7-1	
	7.2	Existing Environment	7-8	
	7.3	Pathway Analysis	7-38	
	7.4	Residual Effects Analysis	7-43	
	7.5	Prediction Confidence and Uncertainty	7-103	
	7.6	Residual Impact Classification and Significance	7-106	
	7.7	Follow-Up and Monitoring	7-113	
	7.8	References	7-114	
	7.9	Glossary	7-118	
	Append	ix 7A Summary Results of Air Quality Modelling		
	Append	ix 7B Air Emission Details		
	Append	ix 7C <u>Dispersion Modelling Approach</u>		
8	WATE	R QUALITY AND QUANTITY	8-1	
	8.1	Introduction	8-1	

	9.1	Introdu	ction	9-1
9	FISH A	ND FIS	H HABITAT	9-1
	Appendi	ix 8H	Acute Toxicity testing of Predicted Jay Project Effluent Composition	
	Appendi	ix 8G	Hydrodynamic Modelling of Jay and Misery Pits	
	Appendi	ix 8F-5	Lac De Gras Predictions	
	Appendi	ix 8F-4	Lac du Sauvage Predictions Part 2	
	Appendi	ix 8F-4	Lac du Sauvage Predictions Part 1	
	Appendi	ix 8F-3	Slipper Lake Predictions	
	Appendi	ix 8F-2	Christine Lake Predictions	
	Appendi	ix 8F-1	Near Field Model	
	Appendi	ix 8F	Hydrodynamic and Water Quality Models of Lac du Sauvage and Lac de Gras	
	Appendi	ix 8E-2	Projected Misery Pit Concentrations 99 Percentile	
	Appendi	ix 8E-1	Projected Misery Pit Concentrations Mean	
	Appendi	ix 8E	Site Discharge Water Quality Modelling Report	
	Appendi	ix 8D	Regional Water Balance Modeling	
	Appendi	ix 8C	Hydrogeological Model for Misery Pit Lake – Post-Closure Period	
	Appendi	ix 8B	Hydrogeological Model for Jay Pit Lake – Post-Closure Period	
	Appendi	ix 8A	Hydrogeological Model – Pre-mining, During Mining and Closure	
	8.10	Glossa	ry	8-476
	8.9	Refere	nces	8-461
	8.8	Follow-	up and Monitoring	8-454
	8.7	Residu	al Impact Classification and Significance	8-441
	8.6	Predict	ion Confidence and Uncertainty	8-419
	8.5	Residu	al Effects Analysis	8-210
	8.4	Pathwa	y Analysis	8-140
	8.3	Water I	Management Summary	8-136
	8.2	Existing	g Environment	8-15

	9.2	Existing Environment	9-13	
	9.3	Pathway Analysis	9-117	
	9.4	Residual Effects Analysis	9-153	
	9.5	Prediction Confidence and Uncertainty	9-201	
	9.6	Residual Impact Classification and Significance	9-205	
	9.7	Follow-up and Monitoring	9-217	
	9.8	References	9-220	
	9.9	Glossary	9-239	
	Append	lix 9A Conceptual Offsetting Plan		
	Append	lix 9B Conceptual Fish-Out Plan		
	Append	lix 9C Conceptual Aquatic Effects Monitoring Program		
10	TERR	<u>IN</u>		
	10.1	Introduction	10-1	
	10.2	Existing Geotechnical Stability of the Proposed Waste Rock Storage Area	10-7	
	10.3	Environmental Effects on Geotechnical Stability of Engineered Structures	10-29	
	10.4	Mitigation and Monitoring	10-56	
	10.5	Summary	10-58	
	10.6	References	10-61	
	10.7	Glossary	10-64	
11	VEGE	ATION		
	11.1	Introduction	11-1	
	11.2	Existing Environment	11-8	
	11.3	Pathway Analysis	11-23	
	11.4	Residual Effects Analysis	11-41	
	11.5	Prediction Confidence and Uncertainty	11-60	
	11.6	Residual Impact Classification and Significance	11-63	
	11.7	Follow-up and Monitoring	11-75

13.6 Residual Impact Classification and Significance 13.7 Follow-Up and Monitoring 13.8 References 13.9 Glossary		13.4	Residual Effects Analysis	13-93
13.7 Follow-Up and Monitoring 13.8 References 13.9 Glossary		13.5	Prediction Confidence and Uncertainty	13-137
13.8 References 13.9 Glossary		13.6	Residual Impact Classification and Significance	13-141
13.9 Glossary		13.7	Follow-Up and Monitoring	13-154
·		13.8	References	13-156
Appendix 13A Absolute Values for Landscape Metrics in the Effects Study Areas for Wildlife		13.9	Glossary	13-175
		Append	ix 13A Absolute Values for Landscape Metrics in the Effects Study Areas for Wildlife	

	Append	dix 13B Noise		
	Append	dix 13C Resource Selection Function Maps and Habitat Suitability Index Maps		
	Append	dix 13D Noise Assessment Results and Wildlife Zones of Influence		
14	MAXIN	MAXIMIZING BENEFITS AND MINIMIZING IMPACTS TO COMMUNITIES		
	14.1	Introduction, Methods and Social Management	14-1	
	14.2	Population Demographics	14-43	
	14.3	Economy	14-49	
	14.4	Employment and Incomes	14-67	
	14.5	Education and Training	14-80	
	14.6	Health and Well-being	14-87	
	14.7	Physical Infrastructure	14-106	
	14.8	Non-Traditional Land Use	14-111	
	14.9	Summary and Conclusions	14-115	
	14.10	References	14-118	
	14.11	Glossary	14-126	
	Append	dix 14A <u>Economic Impact Report</u>		
15	CULT	CULTURAL ASPECTS 5		
	15.1	Introduction	15-1	
	15.2	Cultural Aspects Methods	15-2	
	15.3	Pathway Analysis	15-21	
	15.4	Residual Effects Analysis	15-29	
	15.5	Follow-up and Monitoring	15-69	
	15.6	References	15-70	
	15.7	Glossary	15-74	
16	ENVIR	ENVIRONMENTAL EFFECTS ON PROJECT		
	16.1	Introduction	16-1	
	16.2	Effects from the Environment on the Project	16-6	

	16.3	Effects from the Environment on the Tibbitt to Contwoyto Winter Road	16-7
	16.4	Summary	16-10
	16.5	References	16-11
	16.6	Glossary	16-12
17	CUMU	LATIVE EFFECTS SUMMARY	17-1
	17.1	Introduction	17-1
	17.2	Cumulative Effects Approach	17-2
	17.3	Air Quality	17-9
	17.4	Water Quality and Quantity	17-10
	17.5	Fish and Fish Habitat	17-13
	17.6	Terrain	17-16
	17.7	Vegetation	17-17
	17.8	Barren-Ground Caribou	17-20
	17.9	Wildlife and Wildlife Habitat	17-23
	17.10	Socio-Economics	17-27
	17.11	Cultural Aspects	17-32
	17.12	Means to Reduce or Avoid Predicted Cumulative Effects	17-33
	17.13	References	17-35
	17.14	Glossary	17-37
18	SUMM	ARY AND CONCLUSIONS	18-1
	18.1	Introduction	18-1
	18.2	Analysis of Alternative Means	18-1
	18.3	Project Summary	18-3
	18.4	Engagement Summary	18-4
	18.5	Air Quality	18-5
	18.6	Water Quality and Quantity	18-7
	18.7	Fish and Fish Habitat	18-9

18.8	Terrain	18-11
18.9	Vegetation	18-13
18.10	Barren-Ground Caribou	18-14
18.11	Wildlife and Wildlife Habitat	18-15
18.12	Socio-Economics	18-16
18.13	Cultural Aspects	18-18
18.14	References	18-19
18.15	Glossary	18-20
