Prairie Creek All Season Road Project, Canadian Zinc Corporation

Re: Teleconference with CanZinc on technical session undertakings #26 and #44

The Review Board staff participated in a teleconference call on Thursday June 23, 2016 with Canadian Zinc Corporation (CanZinc), Tetra Tech EBA (consultants for CanZinc), and Knight Piesold (technical advisors to the Review Board). Participants on the call were:

Review Board staff:	Mark Cliffe-Phillips Chuck Hubert
CanZinc:	David Harpley Alan Taylor
Tetra Tech:	Kevin Jones Bill Rozeboom Doug Johnson
Knight Piesold:	Toby Perkins James Hayley

The purpose of the call was to discuss the wording and intent of draft undertakings from the June 13-16 technical sessions.

The items discussed were:

1. *Undertaking #26 – Sundog Creek alignment*
Resolution: Toby and Bill to work on wording of this undertaking based on mutual understanding arrived at during the meeting.
2. *Undertaking #44 – Terrain stability and mitigations*

Resolution: James and Kevin to work on wording of this undertaking based on mutual understanding arrived at during the meeting.

3. *Undertaking #32- Sundog realigned channel maintenance and dredging*

CanZinc and its consultants advised that dredging of the realigned channel during road operations will not be necessary. CanZinc will provide rationale for this position in its response to the undertaking.

The Final Undertakings List with agreed upon wording for #26 and #44 along with other wording changes from parties and the developer will be posted to the public registry. CanZinc indicates that it will submit responses to some of the undertakings by the end of June and the remainder within the first 2 weeks of July.

Dates for the submission of second round information requests by parties will not be finalized until all responses to undertakings are received by the Review Board.

The contact for the Project is Chuck Hubert at chubert@reviewboard.ca 867-766-7052 and Ruari Carthew at rcarthew@reviewboard.ca 867-766-7073.
