Subject: Terms of Reference for Paramount Cameron Hills EA

Dear Mr. Acorn:

The staff at the Department of Resources, Wildlife, and Economic Development have reviewed the draft terms of reference that were circulated and have a single comment to offer for your consideration. The Department suggests that under section 4.1.7 Air Quality and Climate, point 8 be revised to direct the proponent to assess the impacts of flaring on human health, as well as on wildlife.

Thank you for your consideration of this matter.

My apologies for sending this message to both email addresses. I was not sure which, if any of them Joe is using, and I wanted to be sure that someone got this message.

Brett Hudson
Environmental Assessment Analyst
Policy, Legislation and Communications Division
Department of Resources, Wildlife, and Economic Development
