

...mer and leave once they get experience.
"By having North people trained, they'll stay up here the North and not e once they get experience," said nk.
He added graduates will be immediately useful to employers.
"Operators won't have the additional expense of doing additional training," he said.

Sell some, build some

The Nunavut Housing Corporation will begin selling social housing units this September to current tenants and will reinvest the money into more housing.

For every unit the NHC sells, it plans to build a replacement unit in the same community within a three-year period.

The program is geared towards tenants in the middle to high income brackets (\$45,000 to \$50,000). The housing corporation and local housing associations must agree whether sell the homes, which must be at least 10 years old.

Sale price is based on market value, with the mortgage added to tenant's income.

Mortgage payments and operating costs would be "no more than 20 per cent of a person's gross salary," said Pam ne, president of the Nunavut Housing Corporation.

The housing corporation will hold the mortgage and offer financial counselling to homeowners.

New homes will go to those on the territory's lengthy waiting list for low income housing.

Conoco office in Hay River

Conoco Canada Ltd. is opening an office in Hay River. Conoco — which purchased Gulf Canada last year — said Hay River office will be used to direct the company's interests at the Steen River Gas Plant in northern Alberta, as well as in Hay River and Fort Liard. The office is expected to open later this summer.

PUBLIC NOTICE OF REFERRAL

Dated at Inuvik, Northwest Territories

June 24, 2002

On June 20th, 2002 the Environmental Impact Screening Committee (EISC) referred the development proposal known as **WesternGeco (White), Mackenzie Delta River 2D Seismic Program 2002** to the Environmental Impact Review Board (EIRB) for Public Review. This Public Review is being held pursuant to the Inuvialuit Final Agreement (IFA) which has been approved, given effect, and declared valid by the Western Arctic (Inuvialuit) Claims Settlement Act, being Chapter 24 of the Statutes of Canada 32 -33, Elizabeth II (1984).

The purpose of this review is to assess the potential environmental effects of the proposed operation and, as well, for the EIRB to recommend whether or not the development should proceed and, *if it should*, under what terms and conditions-including mitigative and remedial measures. The Review Board may also recommend that the development should be subject to further assessment and review and, if so, the data or information required. [IFA 11.(24)]

The Environmental Impact Review Board invites organizations, government agencies, and members of the public to participate in the review and to make submissions to the Review Board concerning these matters. Individuals and/or organizations that intend to make submissions should register by letter with the Secretary of the Environmental Impact Review Board.

Registered participants will be placed on a mailing list, and thereafter will receive all documents designated for distribution, including the proponent's environmental impact statements (EIS), subsequent notices, procedural rulings, and other written submissions.

Registered participants may take part in the public review via their written submission or, in the event of a public forum, by sending a delegation. If a public forum is held, individuals and organizations that do not register an intention to participate may make oral submissions after registered participants have been heard.

Anyone wishing further information concerning this public review, or who would like a copy of the Environmental Impact Review Board's Operating Procedures should contact:

Jonathan W. Allen, Secretary
Environmental Impact Review Board
Joint Secretariat Inuvialuit Renewable Resources Committees
