Dear Mr. Christensen,

**Re: Preliminary Screening Report
Recommend Environmental Assessment
Northrock Resources Ltd. - Summit Creek Drilling**

The SAHTU Land & Water Board at its meeting yesterday March 20th accepted and approved the enclosed Preliminary Screening Report. The Preliminary Screening found that the development proposal might have public concern.

Pursuant to the Mackenzie Valley Resource Management Act (MVRMA) Section 125 the Board recommends that an Environmental Assessment of the proposed development be carried out.

I trust our comments and recommendation will receive your careful consideration.

Respectfully yours,
SAHTU Land & Water Board

G.T. Govier
Executive Director
