**Subject:** Meetings and such with respect to CGW Land Use Permit

Sherry,

My biggest fears are being realized and I am unclear how to stop it.

Cons. Goldwin rights are being completely violated as the bureaucrats run amok. I have requested that the CGW Land Use Permit be on a stand alone basis because of the time factor involved in expanding it.

I see from the correspondence that DFO; INAC; the NSMA; have all asked for extensions because three assessments are too much - and were not even out of the starting gate.

I see there are meetings being held between MVEIRB and other parties (to wit the YKDN) with respects to our application that we are not invited to! I do not care if they are technical or what ever, I should be informed well before of there occurrence and be given the opportunity to attend or send a representative or such.

It is after all OUR APPLICATION!!!

I do not like the extension of time to July 11th for comments - I expect to see the final ToR on that date. The comments were to be in by June 30th. I am disgusted with the excuses of the departments involved - this is not a major undertaking - is there no one there recognising this.

The excuse of too many projects and too much area is exactly why I have resisted the grouping that you have all favoured - It is no benefit!

I have asked now I am insisting that we have a phone conference call with Vern as well because I want to know now if I have to start legal action to rein in the board!

Please contact me asap.

Please cc this to Vern and Alan

Thank you
