Sherry Sian  
Environmental Assessment Officer  
Mackenzie Valley Environmental Impact Review Board  
2<sup>nd</sup> Floor Scotia Centre, 5102-50<sup>th</sup> Ave  
Yellowknife, NT X1A 2N7

Dear Ms. Sian

**Culture, Heritage & Languages, GNWT**  
**Comments on Drybones/Wool Bay Environmental Assessments**

As per our meeting on Thursday July 17, 2003, the Prince of Wales Northern Heritage Centre (Culture, Heritage & Languages Division of the Government of the Northwest Territories) has the following comments regarding the environmental assessment proceedings of the Drybones/Wool Bay diamond exploration projects:

There has never been a systematic archaeological survey conducted along the north shore of Great Slave Lake, and as a result we lack archaeological baseline data for the Drybones/Wool Bay area. Judging by the extensive record of traditional land use known through Yellowknives Dene First Nation oral histories, it is clear that the area has a long history of human activity. Consequently, it is expected that there would be many archaeological sites in the area.

On the basis of these observations, we strongly recommend that a systematic archaeological survey be completed in the land use area prior to the commencement of mineral exploration activities.

If you require further information, please contact Tom Andrews, Territorial Archaeologist, or Kathleen Groenewegen, Geographical Information Systems (GIS) Assistant (Intern), at 873-7551.

Sincerely,

Charles D. Arnold  
Director  
Culture, Heritage & Languages  
Department of Education, Culture & Employment  
Government of the Northwest Territories

- c. Tom Andrews, Territorial Archaeologist  
Gavin More, Manager, Environmental Assessment  
Kathleen Groenewegen, GIS Assistant (Intern)
