To Whom It May Concern:

Tamerlane Ventures Ltd.

This letter will confirm my support as MLA for Hay River South for the proposed Tamerlane Ventures project.

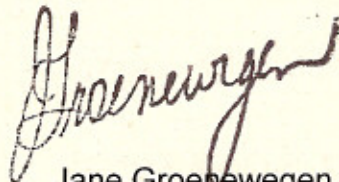

I have been provided with details of this proposed project through Tamerlane's representatives, David Swisher and Jerry Demarco on their numerous visits to the north. Their communication and consultation on this project has been extensive and should serve as a model for companies wishing to do business in the north.

Exploration and mining in the Pine Point area in the past provided a significant contribution to Hay River's economy. Changes in markets and product demand have once again created interest in the viability of mining in this area.

I am aware that Tamerlane is taking every opportunity to ensure that the stringent environmental review process is being addressed to the fullest.

We wish them every success in their endeavour and look forward to the anticipated economic activity in our community.

Yours truly,

Jane Groenewegen
MLA Hay River South
