RE: Party Status Applications

The Mackenzie Valley Environmental Impact Review Board (Review Board) met in Yellowknife on October 23, 2008, to discuss granting of party status for organizations who wish to become parties to the environmental assessment of Selwyn Resources' proposed mineral exploration program at Howard's Pass.

The following organizations and individuals were subsequently granted party status by the Review Board:

- Parks Canada
- Department of Fisheries & Oceans
- Government of the NWT
- Indian and Northern Affairs Canada

Granting party status to an individual or organization gives them standing in the EA and allows the parties to suggest information requests, give presentations and pose questions to other parties at hearings.

Regards,
