

Note to File

Selwyn Project- Howard's Pass Mineral Exploration

EA 0708-001

April 27, 2009

All parties to the above environmental assessment are now advised that the Review Board has closed the public record. However a request has been sent out to the GNWT for clarification on a point it made in the Tulita community hearing on April 7th, 2009. This information will still be accepted by the Review Board which has been requested by May 4th, 2009. The Review Board will then proceed with its deliberations on the information it has received throughout the environmental assessment process.
