Subject: Taltson transmission line

Hello Mr. Decorby,

To recap what we discussed on the phone, the Review Board is conducting an environmental assessment of Deze Energy's proposed Taltson expansion and transmission line. **The developer has recently proposed changing the transmission line route to extend past Reliance following the peninsula between Charlton Bay and McLeod Bay. (Click here to see the proposed route:**

http://www.reviewboard.ca/registry/project_detail.php?project_id=68&doc_stage=14).

The Review Board wants to bring this to the attention of anyone with cabins, leases, or other interests in the general area of Great Slave Lake's east arm around Reliance, Charlton Bay, Fairchild Point and the easternmost end of McLeod Bay.

The Review Board is seeking the views of anyone with a direct interest in this area. Although the general public record is now closed for this assessment, an exception will be made for comments about this proposed route only. **Comments about the newly proposed route change will be accepted until 5:00 pm on Feb. 18th, 2010.**

I am attaching Fig. 6.4.9 from the Developer's Assessment Report, which shows part of how the towers will look. There are different types of tower designs that the developer could use in the new stretch. A bit more can be found on visual effects on **page 106** of the document titled "Commitments from Deze Energy". It is dated Nov. 2, 2009. The date will help you find it on our webpage: http://www.reviewboard.ca/registry/project_detail.php?project_id=68&doc_stage=7 .

You asked about other major routes considered by the developer. Studies with details of these this webpage: http://www.reviewboard.ca/registry/project_detail.php?project_id=68&doc_stage=14 . Scroll down to documents filed on January 27th, 2010 and you will find them.

People involved in our environmental assessments usually want to see any new documents that are posted. You can sign up to get a daily notice if anything new is posted. I recommend you register. To do this:

1. Go to our website (www.reviewboard.ca) and click on "E-mail subscriptions" in the beige box on the left side of the screen.
2. Scroll down to "New Users", enter your name and e-mail address, and give yourself a password.
3. Then, scroll down more and tick the "designated contact" box (that's the blue column) for the Taltson project.
4. Hit the "Register" button at the bottom.

Once you've done this, you will be on our distribution list, and you will be automatically notified daily when new material is added to the record.

For more information on the proposed project and the proposed route, see the Review Board website at www.reviewboard.ca or call me at the number below until this Friday. **After Feb. 5th, 2010, I will be travelling, and you should call Martin Haefele at (867) 766-7053.**

Please share this e-mail with anyone you know in the area if you are able to. Or, if you have any suggestions about how I can contact people in the area, please let me know. I will be writing a Note to File so that our conversation today will go on the public record.

Sincerely,

Alan Ehrlich

Dear Ray Decorby,

Below is the e-mail I mentioned in our discussion. It includes links to the public record as posted on our website and instructions regarding how to subscribe for e-mail notifications. Note that After Feb. 5th, 2010, I will be travelling, and you should call Martin Haefele at (867) 766-7053.

Regards,

Alan Ehrlich
