Subject: Inquiry from Website - Intervenor Funding

Hi Rick!

I was just reviewing some of the responses to the undertakings on the Giant Mine Remediation. It seems fairly clear that both the federal and territorial governments as co-proponents will not necessarily consider issues outside the current project proposal (or perhaps serve the broader public interest). This puts the public in a very tenuous situation and certainly raises questions about how democratic the review process will be. I think this is a very good reason for making intervenor funding available for the Yellowknives, the City of Yellowknife and other individuals/groups concerned about a thorough and comprehensive assessment process.

Thank you.

Lois Little
