

Note to file

EA 0809-002

Canadian Zinc Corporation, Prairie Creek Mine

October 14, 2008

The Mackenzie Valley Environmental Review Board wishes to make known to all interested parties that our website is now back up and running. Our Public Registry is being updated for all parties to view relevant material submitted over the past week for the Prairie Creek Mine Environmental Assessment.

Because the Review Board's website was down during the week of October 6-10, the Review Board allowed an extension on the original deadline (October 14th) for scoping submissions from parties. This deadline was set as five working days once the website was back online. **Final scoping submissions are now required to be submitted to the Review Board for the Public Registry no later than 4pm MST, Monday October 20th, 2008.**

As always, if you have any questions, comments or requests for information, please contact me.

Regards,

(original signed by)

Alistair MacDonald
