Re: Listing of New Documents Placed on the Public Registry

Introduction

Attachment 1 to this document lists all of the potentially relevant material provided by Indian and Northern Affairs Canada and Canadian Zinc Corporation in responses to Information Requests made by the Review Board on November 26, 2008. These documents have been grouped where applicable, and are generally categorized by the permit or license they are related to. The documents have been web-linked to the Review Board's website public registry for easy access.

Attachment 1 lists RfR (Request for Ruling) documents 36 through 55. RfR documents 1 through 35 were listed in Attachment 1 of the Review Board's Directive of November 26, 2008, also available on the Review Board's website public registry. Interested parties are advised to consider this documentation as well as other information available on the public record for this file when providing submissions to the Review Board prior to its ruling on the appropriate scope of development for this environmental assessment.

Interested parties are again reminded that submissions are due in mid-January and to consult the Review Board's Note to File on this matter dated December 18, 2008 for more detail.

If you have any questions, feel free to contact me.

Regards,

Attachment 1: Potentially relevant documents 36-55 on the Public Record for EA 0809-002 - Prairie Creek Mine

The following list of documents is in rough chronological order. Documents (or series of linked documents) are labeled “RfR#36, RfR#37, etc.” to match the document numbering on the Review Board’s website at reviewboard.ca. In addition, the table has an embedded weblink for each document (or group of linked documents) for easy access.

Where several files are associated with one particular permit or license application or related environmental studies or correspondence, the file package is either:

- identified as a grouping of documents all scanned together as a single entry on the Review Board’s public registry (e.g., RfR#39 includes 39-1, 39-2, and 39-3); or
- identified as linked documents in the table, but because of the large size of the files, separated on the website public registry (e.g., 36-1, 36-2, and 36-3 are all related to the same topic but are separate files on the website public registry).

The pdf documents on the Review Board website list the RfR numbers as well as the party that provided the information in handwriting in the upper right hand side of the page.

The Review Board has made no determination on the relevance of any of the attached documents to the questions to be addressed in the Request – all are deemed potentially relevant at this time.

Interested parties receiving this by fax should access the weblinked copy of this document at reviewboard.ca. If you have problems accessing the files on the Internet, contact Alistair MacDonald at amacdonald@reviewboard.ca or phone (867) 766-7052. All documents are also on the Review Board’s paper public registry at its Yellowknife offices.
