

Note to File

EA0809-003

Tyhee NWT Corp, Yellowknife Gold Project

Re: Revised Target Schedule and Timeline- February 7, 2013

The purpose of this Note to File is to update parties with regard to the Review Board's decision to develop and distribute a new target schedule and updated timeline in response to Tyhee NWT Corp's letter, dated January 18, 2013.

On December 18, 2012, the Review Board requested that Tyhee provide an update, by January 18, 2013, on its intentions to respond to outstanding information requests which were issued in June, 2012.

In its letter, the Review Board identified previous developer-related delays and articulated its concerns about the timeliness of the environmental assessment process. The Review Board indicated that a new target schedule and updated timeline would be provided to parties based on the developer's response.

In response to the Review Board's letter, Tyhee expressed its intentions to provide responses to information requests by the end of the second (calendar) quarter of 2013 (June 30, 2013).

The Board has decided to revise its workplan once it receives the developer's information request responses.

Correspondence related to this assessment should be directed to:

Shannon Hayden, Environmental Assessment Officer
