**Parks Canada's presentation to the Mackenzie
Valley Environmental Impact Review Board
regarding EA1415-01
Prairie Creek All-season Road Project;
Canadian Zinc Corporation**

- Day 3 Presentation -

**MVEIRB Final Hearings
Fort Simpson, NT
April 26 - 28, 2017**

Outline

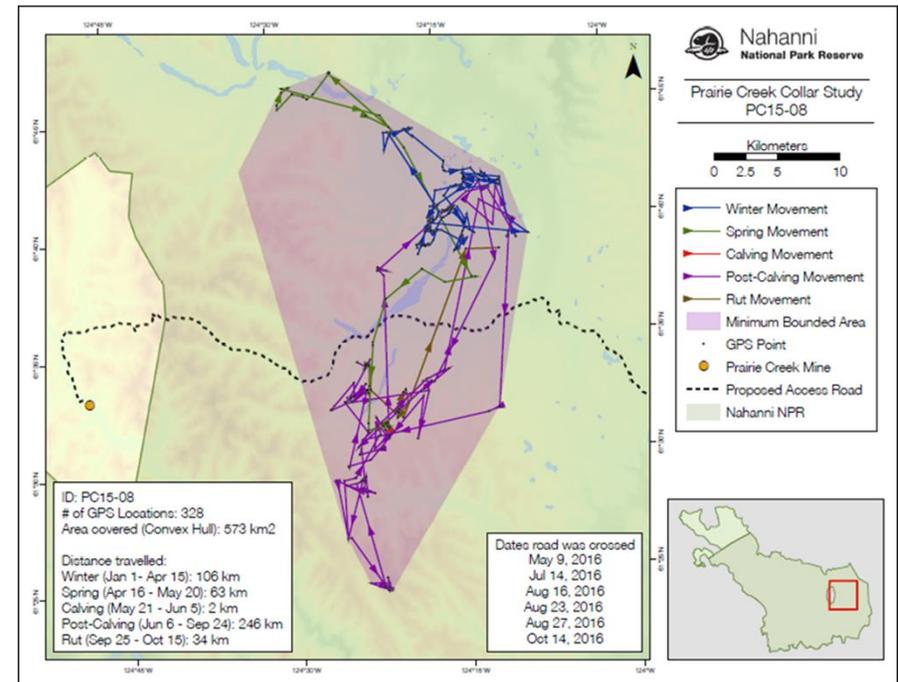

1. Wildlife including birds and species at risk
2. Closure and Reclamation
3. Cultural and Heritage Resources

WILDLIFE INCLUDING BIRDS AND SPECIES AT RISK

- Special Concern, SARA Schedule 1
- Caribou cross road alignment and spend time close to mine site and road alignment
- Recommend monitoring and adaptive management

- Special Concern, SARA Schedule 1
- CZN committed to presence/not detected surveys
- Recommend baseline survey KP 12 – 39, updated effects assessment, monitoring
- Needed to inform effects assessment, mitigations, and monitoring

- Several SARA schedule 1 species
- CZN has conducted surveys but gaps remain
- Species-specific mitigations may be required
- Recommend baseline surveys, updated effects assessment, monitoring

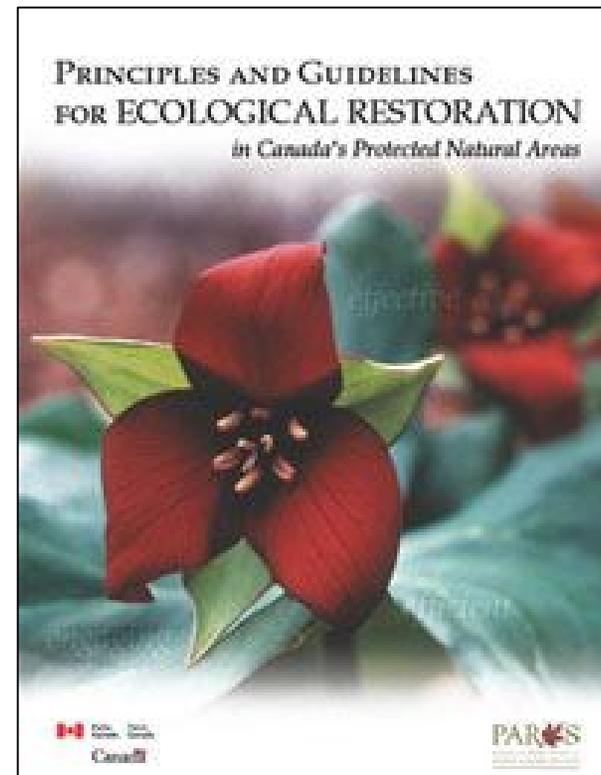

CLOSURE AND RECLAMATION

- Existing reclamation plans lacks information on targets, time lines, and monitoring

CULTURAL AND HERITAGE RESOURCES

- Agree that an AIA should be conducted

- Recommend that all Indigenous groups be included and all areas of archaeological potential be identified

SUMMARY

- Individual project components may cause significant effects
- Not enough information to determine significance of entire project
