EA1415-01-Phase 1 Item 2 Technical Sessions

Dear Madam,

In response to The Review Board (EA1415-01) Prairie Creek All Season Road Project, Canadian Zinc Corporation letter dated May 16th 2016, we are pleased to identify (and prioritize in terms of schedule) below the major issues and key lines of questioning we intend to discuss during the technical sessions foreseen June 13th -16th in Yellowknife.

The issues and key lines of questioning are paramount to enable the preparation of a risk assessment which will comply with the requirements set forth in the Scope of Work, Schedule B Risk Assessment of (EA1415-01) Prairie Creek All Season Road Project, Canadian Zinc Corporation.

- Defining the system to be assessed.
- Data gap analysis.
- Hazard analyses (geo, hydro, sensitive areas, traffic, road).
- Consequence analyses.
- Mitigations and alternatives.
- Risk tolerability.

The six issues and key lines of questioning cover the entire system to be assessed and, to maximize efficiency and focus of the overall discussions, should be treated before any "segment by segment" discussion.

Kindest regards,

César Oboni,
VP, Risk Advisor
