

NOTE TO FILE

Mackenzie Valley Environmental Impact Review Board

From: Heidi Klein, Executive Director, MVEIRB

Subject: BHP

Date: April 27

Our file: 99-00

Spoke to Judy Aldous, CBC, 920-5429. She had general questions about the new EIA process now that the BHP pipes had been referred. Told her that it was a 3 part process. The PS had been referred. She asked what was the original application. I said that I believe it was a water licence application. I had not read the project description yet to see what was entailed.

Said the Board would meet to discuss in the next 2 weeks and that we would also be meeting with the proponent.

She wanted to know what else the Board was doing. I mentioned we were doing info sessions, transition projects and an EA on a forestry project.
